While I only had the opportunity to work with Bridget for a short period time she exhibited many qualities of a tremendous team member and very conscientious designer. She skillfully and easily joined a newly formed team, cultivating outstanding relationships with her new teammates and bringing much needed expertise in her area of iOS design. Bridget was spread thin and assigned to multiple projects simultaneously but still was always able to keep pace with the development team and establish a bit of a runway for herself. She is a user oriented and customer focused designer, one in which would benefit any organization.*
